

PRESS RELEASE

November, 2022

eVETMI-Enhancing Vocational Education and Training (VET) through Mobility and Internships is a 2-year project that aims to develop and improve the digital, linguistic, business, intercultural, soft skills, marketing skills and internship prospects and mobility between VET trainees and companies.

We have already started working on a platform for internship and mobility. The platform will act as a bridge between employers / providers of internships and mobility and VET trainees, allowing the latter to enter directly and smoothly into the labour market.

We recently conducted surveys in Greece, Italy and Germany in order to identify the needs of VET trainees and trainers. At the same time we interviewed companies representatives to identify the shortcomings in the labour market but also to develop a platform based on the real needs of trainees and recruiters.

Finally, the official website of the project will be launched soon!

We will keep you informed for our next steps. Do not hesitate to follow our [social media](#) for more updates!
